What is Culture?

- Culture is the shared ways in which groups of people understand and interpret the world
- [Culture] is the collective programming of the mind that distinguishes the members of one group ... from another

Is That a Problem?

Culture hides more than what it reveals, and strangely enough what it hides, it hides most effectively from its own participants

Use the Advice Feature

The screenshot displays the GLOBESMART PROFILE interface. At the top, there is a navigation bar with links for 'portal', 'tools', 'learning paths', and 'global advice'. The main header includes the 'GLOBESMART PROFILE' logo and a 'Select Language: English' dropdown. Below the header, a navigation menu contains 'Resurvey', 'Profile' (highlighted), 'Overview', 'Invitations', and 'Compare'. The 'Profile Description' section is active, showing a chart with five dimensions: independent vs. interdependent, egalitarianism vs. status, risk vs. certainty, direct vs. indirect, and task vs. relationship. A callout box points to the chart with the text: 'Click on the chart to view more information.' Below the chart is a blue button labeled '> Get Advice'. On the right side, there are buttons for 'Compare My Profile', 'Clear Selection', and 'Print Profile'. A user profile for 'erv thomas' is visible, along with a selection for 'India'.

Independent/Interdependent

People in India are somewhat more **interdependent** than you. This means that they may conform to social norms more than you do. Because of this, some of your counterparts from India may:

- Require more input from others before taking action than you do;
- Take more time in their decision-making process than you;
- Be less forthcoming about speaking of their achievements than you;
- Offer fewer personal opinions and be more cautious in expressing disagreement than you;
- Have more appreciation of protocol than you.

Further Info

Research confirms that Emotional Intelligence, or EQ, accounts for a much larger portion of our career success than our purely intellectual IQ. Analysts estimate the importance of EQ to career success (relative to IQ) as being between 80 and 99%, depending upon the complexity of the position. This should not come as a surprise; every day we see those with superior professional networks, influencing skills, managerial acumen, conceptual thinking abilities, and other “soft” skills achieving career success. Whether we like it or not, those are the skills that take our teams and our own careers the farthest.
